DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4, 6, 9, 12-18, 21, 22, 24, 29, 31, 32-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Olliges et al (6,659,225). Olliges discloses a stairwell for accessing an overhead module on an aircraft having slidable stairs (32a), a railing (32d), an actuation system (#42 & #48), wherein the stairs are deployed when access to the overhead module is required/requested.

Allowable Subject Matter

3. Claims 3, 5, 7, 8, 10, 11, 19, 20, 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 25-28 and 40 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter:

Re - Claims 3, 31 and 40: The prior art does not disclose a folding staircase for accessing an overhead module in an aircraft.

Re - Claim 5: The prior does not teach rotating the stairs in opposite directions

Re - Claim 7, 8: the prior does not teach a potential energy device for deploying or stowing of the stairs in combination with an aircraft.

Re - Claim 10: the prior art does not teach any of the electrically operated, hydraulically operated or pneumatically operated actuation systems claims.

Re - Claim 11: the prior art does not disclose a lanyard in combination with the slidable/retractable staircases.

Re - Claim 19 and 20: the rail members of the retractable staircases for overhead modules do not translate in relation to the stairs.

Re - Claim 25: the prior art does not disclose a rail system for an overhead module stairwell having a plurality of balusters coupled to the stairwell, a plurality of rails, where the balusters and rails have deployed and stowed states.
